The Problem: Hard to Speak Up in Big Halls

Passing wireless mic is difficult, even if one is available!

The Problem: Clarifying the Meaning while Asking

The Problem: Taking Real-Time Quizzes during the Lecture

A small quiz (2)

Who's the EU commissioner for agriculture and rural development?

A) Dacian Ciolos

B) Mariann Fischer Boel

C) José Graziano da Silva

The Idea

The Idea

Real-time communication link between the lecturer and the students

Transmit students' voice to the classroom's speakers

View students' sketches on the projector

Take real-time quizzes to evaluate students' understanding

Goal: Facilitate communication and interaction between the lecturer and the students

Ask Aloud Overview

Advantages

Convenience: Students can speak aloud at their own seats

Cost-effective: Uses the classroom's audio/video system

Available: Most students have smartphones

Zero Setup: Only install an app. or use the web-based system

Works over Internet

Implementation Options

Integrate into already-developed course management systems like Moodle, Piazza, etc.

Develop native applications for major platforms: Windows, Android, macOS, iOS

Thanks for your attention!
